

Star light, star bright

Star light, star bright,
First star I see tonight,
I wish I may, I wish I might,
Have the wish I wish tonight!

About the rhyme

This is a rhyme about the magical first star to appear in the sky at night.

Activities

- Take your children outside when it starts to get dark. Look up at the sky and wait for the first star to appear. Then say the rhyme together!
- Together with your children, draw and cut out lots of stars. Use tinfoil or the inside silver part of some chip packets to make the stars shiny, and/or colour some of them bright colours. Hang the stars from a piece of string across a window or stick them onto a window.
- Ask your children what they most wish for. Make a wish list for each of them, or let them write their own wish list.
